

# **FOG**view

# Ultra High-Contrast Camera for Low Visibility Environments

#### **KEY FEATURES**

- Provides evidential quality video imagery in all low visibility conditions including smoke, rain, mist, fog, dust & spray
- Auto contrast correction by up to 15dB
- Advanced image processing allows the cameras to see past bright objects such as headlights and maintain the ability to read number plates.

## **OUR MARKETS:**

## THE CHALLENGE

Having the versitility to be able to make informed decisions in all weather conditions and poor visibility means generating high quality surveillance images:

- Through fog and mist
- Through thick rain
- Through smoke and obscuration
- Through snow
- · Through sand and dust storms

#### THE SOLUTION

VIT's FOGview camera utilises novel pixellevel technology on a top quality CCD with military grade image processing firmware to provide a uniquely effective solution.

FOGview offers unparalleled video image quality in the most testing of weather conditions and low visibility.
