

...security doesn't have to be difficult.

...relax, your property is being watched by the best.

Security. Wherever in the world you may be.

Formed in 2002 and using expertise gathered from our work with military and government agencies, VIT Security Group brings a new level of the coordination of its manufactured CCTV camera solutions, information technology and secure monitoring to the private sector.

We design, manufacture, install, monitor bespoke and evidential quality camera systems which enable our clients to fully utilise the applications of CCTV anywhere in the world.

Our systems are capable of viewing in ultra-low-light conditions, at a distance, and through smoke and fog. We can even monitor the temperature of your refrigeration plant.

VIT Security Group's core services include:

Evidential CCTV

- CCTV cameras (including IP, long range, infrared, ultra low-light, pinhole, waterproof, mini, dome)

...seeing is believing.

"I believe VIT Security Group's products are genuine battle winners which will provide commanders with a technological edge in complex operating environments...I am delighted to be joining them in an advisory capacity at this exciting time in VIT's development." **Brigadier Ed Butler DSO.**

"I have not found another company that holds the solution to the vast (and sometimes surreal!) requests that we demand here at Southbank Centre in such an innovative and suitable fashion. The team that supply and execute the service are second to none, they are always helpful and experienced." **Security Director, The Southbank Centre.**

"The position to date is that all the accused charged using VIT equipment have pleaded guilty". **Local police, 2009.**
