

Awards

Since the Company's formation in 2002, VIT has been awarded several accolades that acknowledge not only our capability for technological innovation but also our commitment to our corporate responsibility.

Awards won by VIT include:

Associations

Our commitment to driving up standards of visual verification technology and the surveillance capabilities of our clients has led VIT to join some of the most widely respected organisations in the UK security industry –

- ADS the Aerospace, Defence and Security Association
- City of London Crime Prevention Association
- The SITC, the security, innovation and technology consortium – a subgroup of ADS

VIT's Safecontractor status: As a leading health and safety pre-qualification assessment scheme, VIT complies with promoting higher standards of competence and compliance through the provision of relevant industry specific and tailored health and safety assessments.

Overview:

VIT Security Group is a world-class, award-winning provider of visual verification technology, with 10 years respected trading, dealing with the most demanding clients and the most exceptional circumstances.

All of VIT's technologies and services have been developed in line with our mission:

“ to reduce and prevent serious threats to the security of our clients, with a view to saving lives... ”

We regard it as our duty to provide best-in-class products and to enhance the user experience through provision of evidential quality imagery constantly and consistently.

- Surveillance 'One-stop-shop'
- Proven International Pedigree
- Unique Technology

Introduction:

VIT Security Group delivers a complimentary suite of visual verification products that have proven success in serving customer requirements for low-light, long range, through-fog and for infinite depth of field. Our surveillance solutions are designed to operate in challenging environments such as in areas of low power or no power, and in ultra-low-light conditions – two of VIT's many particular competencies.

VIT's staff collectively possess a wide range of expertise in all aspects of operational surveillance and the available technology. Our team of engineers and developers boasts expertise in optics, electronics, surveillance, remote communications and security monitoring. We are continually innovating and we retain a dedicated research and development team who are able to tailor solutions to meet constantly emerging requirements.

Further to this, VIT offers

- Sophisticated design capability with a range of expertise and services including 3D, CAD and CAM design specialists, prototyping services and metal working facilities.
- A dedicated control room.
- A research and development team able to work with clients to optimise products, ensuring our enduring capability to consistently deliver technically advanced surveillance solutions.
- Commitment to designing, engineering and manufacturing products to the highest aesthetic and operational tolerances.
- Turnkey surveillance solutions including cameras, DVRs and display equipment.

In association with our partners we operate fully scalable production facilities in the South of England. We are able to meet demanding large scale manufacturing requirements.

Our state-of-the-art warehousing and manufacturing facilities provide the ideal environment for high quality production and R&D.

With technology rapidly developing, surveillance for safety, security and protection requires current expertise. We offer consultancy in the provision of:

- Covert Surveillance Design
- Covert Operations
- Investigations
- Electronic Counter Measures

We produce a range of high integrity evidential quality video cameras. Utilising unique technologies we specialise in:

- Long Range
- Ultra Low-Light
- Low Visibility/High Contrast
- Low Power
- Infinite Depth of Field
- Surveillance Ancillaries & Controllers
- Digital Video Recorders
